DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group II (claims 6-17) in the reply filed on March 10, 2005 is acknowledged.
2. Claims 1-5 and 18-21 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on March 10, 2005.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitations "a sensor which is configured to attach to one of a module and the module holder" (i.e., the sensor attached to either the module or the module holder) and "an element attached to the other of the module and the module holder" (i.e., the element attached to either the module or the module holder) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet,

Art Unit: 2829

and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

4. The disclosure is objected to because of the following informalities:
 - a/ on page 9, line 9, "54" should be -- 58 --.
 - b/ on page 10, line 6, "58" should be -- 68 --.
 - c/ on pages 12 and 13, lines 5 and 3, respectively, "86" should be -- 90 --.Appropriate correction is required.
5. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Objections

6. Claims 6 and 8 are objected to because of the following informalities:
 - a/ in claim 6, since as disclosed in the Applicant's specification page 8, lines 15-25, the sensor 60 attached to the card cage 30, and the circuit board element 58 attached to module 36; therefore, the limitations " a sensor which is configured to attach to one of a module and the module holder" (lines 3-4), and "an element attached to the

Art Unit: 2829

other of the module and the module holder" (lines 4-5) should be -- a sensor which is configured to attach to the module holder --, and -- an element attached to the module --, respectively.

b/ in claim 8, line 2, the limitation "the element and the module" is duplicated recitation, therefore, the limitation "further comprising: the element and the module," (lines 1-2) should be deleted.

Appropriate correction is required.

Conclusion

7. This application is in condition for allowance except for the following formal matters: the objections to the drawings, the specification, and the claims set for above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The following is a statement of reasons for the indication of allowable subject matter:

Claims 6-17 recite, inter alia, a control system for indication whether a module should be inserted into a module holder, the control system comprising a sensor configured to read an identifier of an element attached to the module when the module begins insertion into the module holder; a controller configured to receive the sensor signal from the sensor and output a control signal based on the sensor signal, the

Art Unit: 2829

control signal indicating whether the module is authorized to substantially insert into the module holder.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include the above limitations.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

Yamaguchi et al.	6,577,507	Automatic Circuit Board Plug-In System.
Winch et al.	6,310,783	Modular Method And Apparatus For Building An Uninterruptible Power System (UPS).
Hamilton et al.	6,100,706	Burn-In Board Support Frame Having Inserter And Ejector Bars For Racks Of Burn-In Boards.
